

Testimonials

Arun Dev Prabahaar,
NOC Engineer at Oman International Telecommunication Contracting LLC.
My UG life in the Civil Engineering branch was a joyful journey. Greenery and Elite Infrastructure has given me a peaceful and learning environment. The faculty had trained me well in technical and personality development. The best part of college life is the bond we share with the teachers. It changed my attitude towards life and transformed me and developed my skill.

Sathishkumar P (Batch 2010-14) - Entrepreneur
KPRIET guided me in gaining experience at both social and professional levels. I still love this place and respect those who helped me to gain such a position in the industry. Still I am actively involved in social activities which I started during my college days.

Mr. M. Ramprathap,
Engineering Manager,
Building & Factories division,
L&T, Chennai

For their commitment to quality education, I can admire the management. They are trying to incorporate numerous new clubs and systems to bring out the student's talent that is lacking in many of our academic institutions. I congratulate the Principal and Management on this audacious effort to deliver quality in engineering education and to bring out every student's secret talents as well. I wish them continued success in this endeavour.
