VISION AND MISSION OF THE DEPARTMENT

Vision:

To be the **centre of higher learning** in the field of Electrical and Electronics Engineering by educating the students to meet the **global challenges** with **professional ethics and social consciousness**.

Mission:

- Providing **technical, intellectual and ethical** environment to the students through **knowledge centric education and research**.
- Collaborating with industries in the vicinity, nationally and internationally for exposure and **innovation**.
- Enabling the students to **serve the society** through **prolific ideas**.

Programme Educational Objectives (PEOs)

The Graduates of Electrical and Electronics Engineering will

- **PEO1** Possess an adequate knowledge to meet the needs of the stakeholders and excel in their chosen profession with good communication and managerial skills.
- **PEO2** Adapt to emerging technologies and practice their profession confirming to ethical and human values.
- **PEO3** Continuously improve the habit of self-study through professional development activities.

Programme Outcomes (POs)

Graduates of Electrical and Electronics Engineering will be able to:

- **PO1 Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO2 Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3 Design/development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

- **PO4 Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO5 Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO6 The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO7 Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO8 Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9 Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10 Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11 Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO12 Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

Programme Specific Outcomes (PSOs)

Graduates of Electrical and Electronics Engineering will able to:

- **PSO1** Develop skills to the expectations of the dynamic industrial practices in Electrical Engineering and allied areas.
- **PSO2** Analyze, design and integrate various renewable energy sources to meet the energy demand.

ASSOCIATION ACTIVITIES

Energy Saving App Development Program

The Department of Electrical and Electronics Engineering organized Energy Saving App Development program on 03/11/2022. Mr. Jones Barnabas / III EEE welcomed the gathering with a hearty welcome speech. Dr. K. Mohana Sundaram, Professor/EEE delivered the presidential address. The resource person S.Chandra Prakash addressed the gathering and gave glimpse about energy saving techniques and App development. He was enthusiastically shared his experience for business model in energy sector. The event was concluded with vote of thanks.

Expert Visit

The EKKI-KPRIET International Water Technology Centre, KPR Institute of Engineering and Technology, Coimbatore organized the “Expert Visit” in association with EKKI Pumps on 10/11/2022. Prof.B.Lalitha, AP (Sr.G)/Department of EEE, KPR Institute of Engineering and Technology welcomed the gathering and the Head of the Department, Dr. V. Kumar Chinnaiyan, Department of EEE, KPR Institute of Engineering and Technology, felicitated the function. The expert Mr. Thien Han Trieu, International Procurement Manager, Pedrollo S.P.A, Italy is the International partner of EKKI pumps. He visited the EKKI KPRIET International Water Technology Centre (EIWTC) and appreciated the events conduction. He also visited robotics and automation centre, 3D printing laboratory, drones and UAV technology centre to explore the technology.

Webinar on Research Proposal Writing

The Department of EEE organized a webinar on "Research Proposal Writing" and invited Prof. R C Bansal as the resource person to deliver the webinar. This is the first meeting of Prof. Bansal with the faculties of the EEE Dept after he was appointed as the Hon. Prof. of Dept. of EEE. The event was organized via Google Meet on 12/11/2022 from 10.00 AM to 11.00 AM. It was attended by 24 faculty members. Dr. Rakesh and Dr. Pandian welcomed the resource person, and the HOD had a brief introduction about the Dept. It was also a good opportunity for all the faculties to interact with Prof. Bansal and introduce each of them. Prof. Bansal understood the research areas of each faculty. Some of the prominent research areas identified were power system, power electronics, and renewable energy. During the meeting, faculties also discussed about how to approach comments received for their research papers. Prof. Bansal shared that for papers dealing with power electronics, it is necessary to have hardware results and reviewers as well as editors look for the same. Power Systems usually deal with large power and simulation focussed. So the approach towards both these research field needs to be carried out in a different way. This introductory meeting will be followed by a series of other lectures/meetings to enhance the research profile of the Dept. There is also a possibility of Prof. Bansal visiting during vacation time and the same was discussed during the meeting to facilitate.
