KPRIET supports the Sustainable Development Goals

The programme has been organized by the Computer Science and Engineering Department in association with Office of Alumni Relations and ISTE College Chapter. It is planned for Undergraduate students.

Dr.M.Saravanan, Assistant Professor (SI.G) gave welcome address. He delivered agenda of the program. Dr.A.C.Sumathi, Head-CSE given her felicitation address and encouraged the students participate the session interactively. The resource person Mr. Chudhan Kumar Ramasami, Performance Engineer-MTS3, VMware and Virtualization, Bangalore addressed students starting with his introduction and his experience with the industry. He shared his expectations as a student and experience as an employee. The resource person well explained the ways of preparation for industry and expected core subjects (like Computer Architecture, Operating Systems etc.) by the industry. He explained about VMware needs for IT industries and opportunities in virtualization and Hypervisor etc. During the session he gave detailed information about the tools used for Security and modernization etc. The students raised many queries and doubts about the preparedness to the industry. All the doubts are cleared by him. The session was so motivated and encouraged the students. He motivated students to start working on online platforms and live projects.

There are total of 84 participants attended the programme. The session went fine and participants eagerly participated the programme. The vote of thanks is given by Dr.K.Kamaraj, AP(SI.G) / CSE.

Session Screen Shots:

The screenshot shows a Google Meet window with a presentation slide titled "Hypervisor". The slide content is as follows:

Hypervisor
Click add subtitle

- Hypervisor
 - OS is designed to run only on Hardware
 - A low-level program is required to provide system resource access to virtual machine.
- Type1 and Type2 Hypervisor
 - Type1
 - ESX, Xen
 - Type2
 - VMware Workstation, VirtualBox
- Host OS and Guest OS
 - Host OS
 - The bare metal machine/server and the OS you install on server is called as Host OS
 - Guest OS
 - OS you install on virtual machine/VM that is created on top of Host machine is called as Guest OS (GOS)

The slide also features a diagram comparing Type 1 and Type 2 Hypervisors. Type 1 Hypervisor shows a direct path from Hardware to Hypervisor, which then runs Guest OS. Type 2 Hypervisor shows Hardware running a Host Operating System, which then runs the Hypervisor, which in turn runs Guest OS.

The Meet interface shows a grid of participants including Chudan Kumar, CS011_Anbu V, 20CS153-SARMI..., 20CS147- SANJ..., SIVARAMAKRIS..., CS034_Dhinaha..., 20CS162 Siva. L, 54 others, and You. The Windows taskbar at the bottom shows the time as 11:13 AM on 28-08-2021.
